Beneath Enemy Lines is an easy to use, Java based total time submarine simulator. Real time to the max, Beneath Enemy Lines simulates the joys and demands of submaine life, scouring the oceans for days in search of adversary subs and surface vessels and reaching distant lands. A unique, advanced gameplay system which takes account of some of the most important issues of submarine warfare, such as

stealth, sonar evasion, surface ship evasion, the engagement of other submarines and the avoidance of radar. This game is a mix between the traditional simulation of submarines and the more modern text adventure. The biggest challenge of this game is to explain the advanced topics which will never have occurred to the player before. The most important topic which is explained in Beneath Enemy Lines is the new gameplay system. In the game, players navigate the ocean and then get news about the world, they will sail into enemy territory, take a

look at the map, then the game can give the player messages, guides and routes to investigate. The game can also give the player many missions in the game.The missions are mainly divided into two parts, research and combat. In the combat missions, players can call for submarine rescue, anti-submarine operations, or small arms combat against the surface vessel. In the combat missions, players can have different target locations such as ship or submarine, and every target is equipped with air weapons. Depending on the distance of the target, the type of

weapon will be different. In addition, players can also take advantage of a variety of naval missiles, torpedoes and underwater mines. To bring players the joy of exploring the ocean and learning the joys and demands of submarine warfare, Beneath Enemy Lines provides a detailed mission system and scenarios.
